

Abmat™ Premium Weedmat

Abmat™ Premium Weedmat is an excellent quality, UV stabilised hard wearing weedmat with a 5 year UV warranty against degradation. It is especially designed for the nursery industry which requires a product with a long life that is durable enough to handle light traffic and still prevent weeds growing through. It also features light green lines to assist with pot placement.

Note: Weedmat comes in a range of qualities. If using in an exposed situation such as a nursery DO NOT use a standard grade weedmat such as those available in hardware stores. A premium grade weedmat is essential to avoid rapid UV degradation.

Abmat™ Premium Weedmat can also be used as a blackout material.

Code	Colour	Roll Width	Roll Length
