

Abshade

Solarshield Hortcover

Abshade™ Solarshield Hortcover is a reinforced greenhouse film. The reinforced cover consists of thin strips of clear plastic, woven together to make a sheet, similar to a woven weed matting (but clear). This resultant sheet is then laminated with a thin layer of plastic on each side.

The high strength and tear resistance comes from the strength of the woven inner scrim. Unlike extruded covers, the material can be sewn or welded into fitted covers and have pockets and eyelets etc fitted. The two larger sizes are designed with a strong linear overlap weld and packed in bales for easy handling.

It has an amazing **5 Year UV warranty**.

Frameguard Tape must be used with all plastic greenhouse covers supplied by ATS, otherwise warranties will be voided.

Product	Width
Greenhouse Repair Tape - 25m roll	48mm
	96mm

COLOUR	Roll Width	Roll Length
Natural	2.05m	10m
Natural	2.05m	20m
Natural	2.05m	50m
Natural	7.5m (packed in bale)	52m
Natural	12m (packed in bale)	31m

Product	Width
Frameguard Tape 15m roll	24mm
	30mm
